

# Guilherme Lage da Costa

Software Engineer

[LinkedIn](#) | [GitHub](#) | [guilhermecdcosta@gmail.com](mailto:guilhermecdcosta@gmail.com) | +55 (31) 9 9169-8722

## Skills

Java | Spring Boot | Spring Batch | Python | AWS | AWS Lambda | AWS SQS | AWS SNS | AWS Glue | Spark | PySpark | Amazon DocumentDB | SQL | NoSQL | AWS S3 | Git | CI/CD | Jenkins | JUnit | Datadog | Terraform | Linux | Docker | Angular | TypeScript | Microservices | Frontend | Backend | Full-stack | English, Portuguese – *Both at a professional level or above.*

## Experience

<b>NTT DATA Europe &amp; Latam</b>	Remote
Senior Backend Developer	08/2025 – current
<ul style="list-style-type: none"><li>Developed and orchestrated microservices processing over 10 million financial transactions daily using Spring Boot, AWS SQS, SNS, Amazon DocumentDB and Datadog;</li><li>Implemented ETL pipelines to process approximately 1 million operations per day using AWS Glue, Spark, Python, S3, Glue Catalog, Lambda, and SQS;</li><li>Optimized a contract draft recommendation system using AWS Lambda and Python, achieving response times under 2 seconds through function warm-up and multi-level caching strategies.</li></ul>	
<b>Dti Digital</b>	Remote
<p>Full-stack developer</p> <p>01/2025 – 07/2025</p> <ul style="list-style-type: none"><li>Engineered automated document processing system with Spring Batch and Java 17, slashing monthly workload by 95% and saving more than 20 staff hours per month;</li><li>Migrated legacy systems from Java 6 to new architectures in Java 17, upgrading systems that handled 200 transactions per day to over 2,000 per minute;</li><li>Optimized SQL and PL/SQL queries, reducing database load by 50% and decreasing average execution time from 14 hours to 7 hours.</li></ul>	
Full-stack developer intern	11/2023 – 12/2024
<ul style="list-style-type: none"><li>Collaborated on implementing a secure microservices infrastructure in AWS, contributing to API Gateway integration and centralized logging configuration.</li></ul>	

<b>4MTI</b>	Belo Horizonte, MG
Backend intern	08/2023 – 09/2023
<ul style="list-style-type: none"><li>Developed automated web crawlers processing over 10,000 records daily, including a specialized solution that generated R\$ 20,000 in revenue for a key client, using PHP, PostgreSQL, and Puppeteer;</li></ul>	

## Education

<b>Pontifical Catholic University of Minas Gerais</b>	Belo Horizonte, MG
Bachelor's degree in Software Engineering	08/2022 – 08/2026
Postgraduate in Project Management	11/2020 – 11/2021
Bachelor's degree in Civil Engineering	02/2015 – 06/2020

## Licenses & Certificates

<b>System Administration I (RH 124)</b>	Red Hat, 10/2023
<b>Google Cloud Skills Boost</b>	Google, 03/2023
