Skills

Java | Spring Boot | Spring Batch | Spring Security | Python | Angular | TypeScript | HTML | CSS | REST | RESTful | OpenAPI | Swagger | Microservices | Backend | Full-stack | JPA | Hibernate | AWS | Lambda | SQS | SNS | Glue | S3 | DocumentDB | MongoDB | PostgreSQL | MySQL | CloudWatch | IAM | SQL | NoSQL | Docker | Terraform | Linux | Bash | CI/CD | Git | Maven | SonarQube | JUnit | Mockito | Datadog | English, Portuguese – *Both at a professional level or above.*

Experience

NTT DATA Europe & Latam

Remote

Software Engineer

08/2025 – current

- Developed and orchestrated microservices processing approximately 1 million financial transactions daily using Spring Boot, AWS SQS, SNS, Amazon DocumentDB and Datadog
- Implemented ETL pipelines to process approximately 1 million operations per day using AWS Glue, Spark, Python, S3, Glue Catalog, Lambda, and SQS
- Optimized a contract draft recommendation system using AWS Lambda and Python, achieving response times under 2 seconds through function warm-up and multi-level caching strategies

Dti Digital

Remote

Full-stack developer

01/2025 – 07/2025

- Engineered automated document processing system with Spring Batch and Java 17, slashing monthly workload by 95% and saving more than 20 staff hours per month
- Migrated legacy systems from Java 6 to new architectures in Java 17, upgrading systems that handled 200 transactions per day to over 2,000 per minute

Full-stack developer intern

11/2023 – 12/2024

- Collaborated on implementing a secure microservices infrastructure in AWS, contributing to API Gateway integration and centralized logging configuration

4MTI

Belo Horizonte, MG

Backend intern

08/2023 – 09/2023

- Developed automated web crawlers processing over 10,000 records daily, including a specialized solution that generated R\$ 20,000 in revenue for a key client, using PHP, PostgreSQL, and Puppeteer

Pontifical Catholic University of Minas Gerais

Belo Horizonte, MG

Algorithms and data structures tutor

02/2023 – 06/2023

- Tutored students in data structures and algorithms with Java, C, and C++

Education

Pontifical Catholic University of Minas Gerais

Belo Horizonte, MG

Bachelor's degree in Software Engineering

08/2022 – 08/2026

Postgraduate in Project Management

11/2020 – 11/2021

Bachelor's degree in Civil Engineering

02/2015 – 06/2020

Licenses & Certificates

System Administration I (RH 124)

Red Hat, 10/2023

Google Cloud Skills Boost

Google, 03/2023
